Tristone Supplier B2B-/Web-Portal “OTOEDI”

Dear Valued Supplier

We’re going the next step in our initiative of further digitalization and standardization. Please support us in our effort to improve and simplify our cooperation and communication with you.

As we have already announced within the latest release of Tristone’s Global Supplier Logistics Manual we are in the phase of implementing Tristone’s Supplier B2B-/Web-Portal “OTOEDI”.

The “OTOEDI” will be accessible via any internet web browser for following functionalities:

- Scheduling Agreement (blanket Purchase Order)
- Order Coordination
 - Delivery schedules (DELFOR)
 - Call offs / Shipping releases (DELJIT/DELJIS)
 - Shipping Notification (ASN/DESADV)
- Label printing
- Other functionalities will be defined and follow in the near future

To keep the additional workload at all involved parties on the lowest possible level we have defined to onboard our supplier base in different batches. Batch will be communicated separately by mail.

In this moment there’s nothing to do from your side. You will be contacted by our IT team once we are ahead to start with the batch you belong to.

With best regards
Tristone Flowtech Group

Christian Matzanke
Global Logistics Director

Gian Franco Buscemi
Vice President Purchasing
