

Date of last update	13.09.2024
Prepared by	Senior Vice President Quality
Approved by	CEO & President, CFO

Tristone Flowtech Group as a leading company in the automotive industry is committed to follow the requirements of the ISO 14001, legal requirements and the expectations of our Automotive and industry customers.

The compliance to these requirements are carried out through these activities:

- Identifying and complying with legal and other requirements (e.g. given by the OEM) concerning the environment
- Commitment to continual improvement activities and pollution prevention,
- Setting of environmental objectives and targets and continuous reviewing of them,
- Commitment for protection of environment,
- Constant raising employee awareness of their impact on the environment

All employees are aware that achieving success is indispensable linked with respect for the environment

The company constantly strives to reduce its negative impact on the environment in a sustainable way with a particular focus on:

GHG emissions reduction, energy efficiency and renewable energies, decarbonisation, water treatment systems, water quality and consumption, air quality, responsible chemical management, sustainable resources management, waste reduction, reuse, animal welfare, biodiversity, land use, deforestation, soil quality and noise emissions.

Tristone's management is personally involved in efforts to implement these commitments and maintain an environmental management system compliant with ISO 14001.

The environmental policy is communicated to all employees and is available to the public and interested parties.
